Reply to Attn of: EA-05-004

TO: EA/AMS Project Manager

FROM: EA2/AMS Deputy Project Manager

SUBJECT: AMS Project Code

You recently asked if we should modify the AMS project code that is used for drawings, Discrepancy Reports, Task Preparation Sheets, etc. I have reviewed the changes that would have to be implemented in order to make this change. The changes are excessive and would require quite a bit of unnecessary work. For this reason, we will not make a change to the current project code. It will remain SA-AMS instead of changing to 00042 as was proposed.

Sincerely,

Trent Martin
